Day Planner   *https://michlimones.github.io/Day_Planner/*
- Application allows the user to save agenda for that day to the local storage so they may come back to it.
- *Tech:* HTML5, CSS3, JavaScript, BootStraps

Work Experience:

Client Service Analyst   Jan 2021-Present
beneiftexpress
- Analyze electronic files, client imports, carrier exports, payroll exports and deduction files.
- Communicate directly with insurance carriers to make updates and keep eligibility in sync.
- Work daily on client services questions/issues and provide timely follow up to the client or plan participant.
- Post and analyze imported and exported files.
- Troubleshoots any errors on the files as well as enrolling and/or terminating participant's eligibility at each carrier.

Senior Benefit Specialist   Apr 2018-Apr 2020
Avitus Group
- Answered questions the clients and their employees had in regards to the benefits available to them.
- Calculated benefit deductions and worked with the payroll department to make sure the premiums were collected on payroll.
- Paid and reconciled benefit statements from insurance vendors.
- Occasionally made client visits to provide employees with a benefits presentation.
- At the end of the year, setup plans within the enrollment portal so employees could elect their coverage for the following plan year.

Education:

University of Denver Coding Bootcamp   2021-present
Full Stack Web Development
- Learning industry best practices and practical software development standards with a focus on HTML5, CSS3, JavaScript, jQuery, Node.js, React, and algorithms and data structures.

Greeley West High School   2005-2009
Student of the Year: Mathematics 2009
GPA: 3.75
